## HAPPY NEW YEAR!

North Star Electric Cooperative sends wishes to our members for a happy new year in 2022! It has been a privilege meeting your needs over the years, and we look forward to continuing to meet your energy needs.

## WHAT'S NEW

North Star hired a new manager in 2021, after the retirement of long-time employee and general manager, Ann Ellis. Josh Compton joined the cooperative in March of 2021. He previously lived in West Virginia, and has a work history in regulatory affairs, working with electric cooperatives across the United States as a consultant. Welcome Josh!

In other retirement news, another long-time employee, Marty Mollberg, who serves as our operations manager, will be retiring in March 2022. We are in the process of hiring a new operations manager, with the final hiring selection to be made in early 2022. We thank Marty for his over 33 years of service to North Star Electric Cooperative!

## ANNUAL MEETING REPORT

The 2021 annual meeting of North Star Electric Cooperative's members was held drive-in style at the Lake of the Woods School due to the COVID-19 pandemic. We had 130 households and businesses registered. Board members Tom Smith and Lorraine Nygaard both ran unopposed and were unanimously reelected to represent the members in Districts 5 and 6. Our next annual meeting is set for Oct. 7, 2022, at the Lake of the Woods School in Baudette. Please consider joining us for an evening of food, prizes and, of course, information and business.

## YOUR BILL . . . NO RATE INCREASE PLANNED

This enclosed bill is for any electricity you used in 2021, plus a prepayment of your 2022 basic service fee, which is charged to your account on a monthly basis. The total amount due is printed on the bottom of your statement on the remittance stub. Although you prepay a year's worth of the basic service fee, it is charged to your account one month at a time as the year progresses, which is why the current charges total and the total amount due are not the same.

### If paying monthly is more appealing to you:

- 1) We can easily accommodate your request to transfer to monthly billing. The monthly rate is exactly the same as the seasonal rate.
- 2) You may also choose to have your monthly payment paid automatically from your checking or savings account (ACH bank draft). Once established, we would continue to send you a bill

for your records, but you would not need to send anything back to us. There is no charge for this service.

- 3) Budget billing is available to the monthly billed members, which would make your automatic payment the same every month, except the bill due in July, when actual usage is reconciled with budget-billed amounts.
- 4) We also offer bill notifications via email through SmartHub, which is available through our website or through the smartphone or tablet app. SmartHub allows members to see their usage and billing information online, no matter where they are, any time of any day. Having an email address and knowing your account number is all it takes to sign up. Members who live away from North Star country find this helpful, as it eliminates the need to wait for the postal service to deliver your bill. This works really well with the free ACH bank draft method of payment (see above). SmartHub does provide the nonrecurring option of paying with a credit card or e-check, but there is a \$2.50 convenience fee with that method of payment.
- 5) Monthly bills are mailed early in the month, and payments are due on or before the 20<sup>th</sup>. A 1.5% finance charge is added to the bill if the payment is late, and another \$5 is added if a disconnect notice is printed. With ACH bank draft, late fees are eliminated and the payment is set up for the 20<sup>th</sup> of each month.

Annual billing was created for the convenience of members who moved around during the year or who preferred a single, annual billing in the winter. If you still prefer the convenience of the annual billing, but don't like one large payment each winter, you may send prepayments at any time during the year to reduce the annual amount due.

Please give Patsy Olson, our billing coordinator, a call if you have any questions about your bill or to make changes to your account. (1-218-634-2202, toll free at 1-888-634-2202, or by emailing [Patsy.o@northstarelectric.coop](mailto:Patsy.o@northstarelectric.coop))

## CONTACT INFORMATION

There are times when we need to get in touch with you or use your service address (911 address of the property where your meter is located). Please take a minute to look at the phone numbers we have printed on your remittance stub and make any corrections or additions on the stub. Also, if the service address that is printed to the left of your district number (about a third of the way down from the top of your bill) is not correct, please make a note on your payment stub indicating the 911 address or some type of description, like "cabin on County Road 8."

## DUE DATE

PLEASE NOTE THAT YOUR DUE DATE IS **FEB. 20, 2022**. IF THIS CREATES A PROBLEM FOR YOU, PLEASE CALL US TO AVOID DISCONNECTION OF SERVICE. If your payment is late, a 1.5% late fee penalty will be added each month until paid. **The**

**enclosed bill is the only statement you will receive.** If an account is disconnected for nonpayment, there are additional fees: a \$75 disconnection fee, a \$75 reconnect fee (\$150 if after hours), payment for all energy used up to the disconnect date, plus the full annual prepayment. The extra fees and the inconvenience can be avoided by making a quick call to Sue at **1-888-258-2008** to set up a payment arrangement before the due date.

## POWER FAILURE . . . WILL YOUR SEASONAL HOME BE OK?

We always advise members to have someone check on their homes while they're on vacation or, in the case of the seasonal member, when they're gone for an extended time. You never know when a power failure, either in the home or supply lines, will occur. If a seasonal home is not going to be checked regularly, we would recommend the homeowner consider draining the water pipes, turning the breakers off and otherwise preparing the home to be unattended. You never know if a squirrel will decide to scamper across your transformer, blow the fuse and not live to report the outage for you.

## USAGE ALERTS

We'd like to remind our members that SmartHub includes the opportunity to sign up for usage alerts, either by text message or email. Our seasonal and snowbird members find these messages especially helpful to monitor their accounts while they are gone during the cold winter months. To access these features, you will need to log in to your SmartHub account online through an internet browser. Go to the **Notifications** tab and select **Usage**. Under **Power Usage Alert**, you can select

your account, your meter and the thresholds for minimum or maximum usage to trigger an alert message to be sent. Once you've set your parameters, click the orange **Save Subscription** button. Once back at the Manage Notifications screen, click the green **Save Settings** button. Look for the YouTube links to our quick informational videos on our website, which will assist you in setting up these notifications. As always, if you have any

questions, please contact our office at **218-634-2202** and we would be happy to assist you.

## CAPITAL CREDITS

To explain what capital credits are is actually quite simple. Since we are a nonprofit cooperative, the margins (co-op income in excess of costs) belong to the member-owners, like you. At the end of the year, the total margins are prorated among the members based on the amount of their current year billing(s) from North Star. These capital credits are temporarily retained and invested back into the cooperative as capital to fund system improvements, etc.

To explain to a member when he or she may expect a refund is more difficult. Annually the board of directors evaluates the financial impact of paying capital credits. In July 2021, the board authorized the return of more than \$470,000 in capital credits. North Star has returned more than \$14 million of capital credits to its members, like you.

We hope this explanation has answered any questions you may have. Just give us a call or drop us an email if you have further questions.

## OTHER ITEMS OF INTEREST

### **Where does your power come from?**

You can learn a lot from the newly relaunched website of our wholesale power provider at [www.minnkota.com](http://www.minnkota.com). By clicking on the Our Power tab, you can see the breakdown of the cooperative's portfolio of coal, wind and hydropower. You can also view information about its carbon capture effort, Project Tundra.

### **Scholarships for high school seniors**

Our future is in the hands of our young people, and to support their postsecondary education, North Star provides scholarship opportunities to students whose parents or guardians are active North Star Electric Cooperative members. Even if your primary residence is outside of the North Star territory, your student is eligible to visit one of our local schools for the cooperative knowledge-based scholarship testing. We also donate to the local schools' Dollars for Scholars programs.

## Monthly newsletter

We have a monthly newsletter for the year-round residents, and if you are interested in receiving it, just let us know. It is where our official notices are printed. We would be very happy to add you to that mailing list. It is also posted on our website ([www.nse.coop](http://www.nse.coop)) under the News link.

## North Star Electric belongs to YOU

. . . and the other members who purchase electricity from this cooperative. Your capital credits are your portion of your ownership in the co-op. As a member-consumer, you and your neighbors elect a director representative to the board of directors. These elections by district occur with either a mailed vote or at the annual meeting held early each October. The nomination process begins in the summer. So, if you're around, we'd love to see you at the annual meeting.

*We hope you found this newsletter informative and helpful. We also hope you find the electricity we provide to be a good value. We do our best to provide you with excellent reliability and customer service.*

*We appreciate your patronage and we look forward to meeting your needs. We are just a phone call away, so please let us know whenever we can be of help to you or answer any questions. Have a good winter!*

# NOTICE

State law requires that every new electrical installation in any construction, remodeling, replacement or repair shall file a certificate for inspection with the State Board of Electricity and be inspected by a Minnesota electrical inspector.

## State Electrical Inspectors

*Lake of the Woods, St. Louis and Koochiching counties:*

### **Curt Collier**

Phone: (218) 966-5070  
cgcollier67@gmail.com  
Call to set up an appointment between 7 a.m. - 8:30 a.m. (Monday through Friday)

*Roseau County:*

### **Ronald Ditsch**

Phone: (218) 779-6758  
Call to set up an appointment between 7 a.m. - 8:30 a.m. (Monday through Friday)
