

RESIDENTIAL INCENTIVES APPLICATION

The following information is provided as part of the PowerSavers conservation program to encourage residential customers to select and install energy efficient equipment for their facilities. This program is a joint offering from participating utilities of the Minnkota Power Cooperative (MPC) and the Northern Municipal Power Agency (NMPA).

Instructions for Use:

For complete instructions, please refer to the Terms and Conditions on page 8.

Step 1: Determine Eligibility: Equipment must be new and installed in a residence served by one of the participating municipal or cooperative utilities listed on page 2.

Step 2: Install Equipment. New equipment must be installed and old equipment removed. Only new products which are exact product types listed on this form are eligible for prescriptive incentives. If the potential incentive is greater than \$5,000 contact the utility to get pre-approval.

Step 3: Complete and sign the application. Forms must be received within 60 days of installation. Incomplete applications will cause delays in payment.

Step 4: Mail completed application and a copy of the itemized invoice to your participating utility, listed on page 2 of this form.

Requirements for all HVAC Measures:

- Must be installed by qualified, insured contractor. New installations only. Must be the primary heating source for the home and be on a list of prequalified units.
- Unit must be on a list of prequalified units. The furnace and condenser model and serial numbers, evaporator model and serial number, and AHRI reference number are required for all installations. All efficiency ratings will be verified using the AHRI database (ahridirectory.org) or manufacturer specifications.
- Qualifying units are standard split system, furnace integrated for homes with duckwork.
- Attach AHRI Certificate of Product Ratings for the geothermal heat pump installed. If this is not available, a spec sheet from the manufacturer clearly showing efficiency ratings at ISO Standard 13256-1 (water-to-air) or ISO Standard 13256-2 (water-to-water) testing conditions may be provided.
- All open loop geothermal systems consuming more than 10,000 gallons per day or one million gallons per year of water must be permitted by the Minnesota Department of Natural Resources (DNR) before any incentives are paid.
- Geothermal incentives require a heat load calculation to be submitted with the incentive application. Incentive is based off total heating capacity for the home.
- Water-to-water systems need the manufacturer's specifications indicating the equipment meets incentive requirements.
- Units must meet or exceed above efficiency levels or carry an ENERGY STAR qualification. Multi-stage units may be qualified based on the following:

EER = (highest rated capacity EER + lowest rated capacity EER) / 2

COP = (highest rated capacity COP + lowest rated capacity COP) / 2

Additional Requirements on Replacement Geothermal Equipment

1. Incentive available for failed geothermal equipment only.
2. Entire indoor unit replacement is required to receive incentive. Replacing only the compressor will not qualify for the incentive.
3. Equipment must meet or exceed efficiency requirements as stated above at ISO Standard 13256-1 (water-to-air) or ISO Standard 13256-2 (water-to-water) testing conditions.
4. Equipment being replaced must fall outside of any warranty period to receive incentive. Invoice showing proof of purchase must be attached.
5. If equipped with backup electric heat, building must be on load control or demand billing per local utility offering.
6. Heat load calculation required with all replacement applications submitted clearly delineating
 - a. Design temperature used for analysis
 - b. Resulting loss
 - c. Equipment heating capacity required for building

Terms and Conditions

1. **Incentive Offer:** Projects must be implemented (completed) by **December 31, 2023**. An original signed application and invoices for materials and labor must be delivered to the participating utility at the address located on page 2 of this application **within 60 calendar days of installation (completion)**. Please keep a copy for your records.
2. **Proof of Purchase:** This application must have complete information and be submitted with an invoice itemizing the **new equipment purchased**. The manufacturer (OEM) specification sheet(s) are needed only if an AHRI certificate is not available. The invoice must indicate date of purchase, size, type, make, model and total project cost.
3. **Compliance:**
 - a. All projects are expected to comply with federal, state, and local codes.
 - b. All equipment must be new or retrofitted with new components per the program specifications. Used or rebuilt equipment is not eligible for incentives. Existing equipment must be removed or permanently disconnected.
 - c. Equipment must meet specification requirements and be purchased and operating prior to submitting an incentive application.
 - d. Customers may only receive one incentive per piece of qualifying equipment.
 - e. If the project is in a leased building, the term of the lease must be at least five (5) years.
4. **Payment:** Once completed paperwork is submitted, incentive payments are usually made within 45 calendar days. Incomplete applications will either delay payments or be denied. The participating utilities reserve the right to refuse payment and participation if the customer or contractor violates program rules and procedures. All projects exceeding \$5,000 in incentives will be inspected prior to incentive payment.
5. **Inspection:** Program staff may conduct an inspection of the facility to survey installed projects.
6. **Publicity:** The participating utilities reserve the right to publicize your participation in this program, unless you specifically request otherwise.
7. **Program Discretion:** Incentives are available on a first-come, first-served basis. This incentive is subject to change or termination without notice at the discretion of the participating utilities.
8. **Logo Use:** Customers or allies may not use the participating utilities' name or logo in any marketing, advertising, or promotional material without written permission.
9. **Disclaimers:** The participating utilities
 - a. Do not endorse any particular manufacturer, product, labor or system design by offering these programs;
 - b. Will not be responsible for any tax liability imposed on the customer as a result of the payment of incentives;
 - c. Do not expressly or implicitly warrant the performance of installed equipment or contractor's quality of work (contact your contractor for detailed warranties);
 - d. Is not responsible for the proper disposal/recycling of any waste generated as a result of this project;
 - e. Is not liable for any damage caused by the installation of the equipment or for any damage caused by the malfunction of the installed equipment.

INCENTIVE LIMIT:

An incentive exceeding \$5,000 must receive written approval **before** project installation. Total incentives paid are limited to \$10,000 per customer per year. Total incentive not to exceed 50 percent of the project cost.

ELIGIBILITY:

These incentives are offered by member utilities of the Minnkota Power Cooperative, Inc. and the Northern Municipal Power Agency. For questions regarding eligibility, call your local utility listed on page 2.

AC Tune-up Checklist

The technician performing the tune-up must initial that each of the following requirements have been completed. If repair is required above the scope of the tune-up, please note that a proposal was provided to the customer for the additional service in the box provided below.

- Clean and inspect condensate pan and drain
- Clean condenser coil, straighten fins
- Clean evaporator coil, straighten fins
- Clean, repair or replace damaged fan blades (contractor's discretion if they should be replaced or straightened)
- Inspect, lubricate fan motors
- Repair damaged suction line insulation
- Clean or replace air filter (should be performed minimum of 4 times annually)
- Clean or replace grills and screening
- Calibrate thermostat for accurate control
- Describe overall unit condition: Excellent Good Fair Poor
